**A good Giro Rosa for BePink: Alena Amialiusik finishes in the top ten
Georgia Williams is the third best young athlete – Giulia Donato participates to
the European championship.**

Eight stages, almost 800 kilometres. Level ground, steep climbs, an individual time trial race, emotions and adrenaline. This was BePink's Giro Rosa. The athletes, all very young, did well throughout the whole race.

Alena Amialiusik managed to obtain good placements in every stage, especially the hardest ones: in Pontecagnano Faiano she finished 9th, during the most difficult stage, the Varazze-Monte Beigua she closed in 8th place and in the following stage she placed 11th. She also placed 8th during the final sprint in Corbetta.

Silvia Valsecchi did well too, and during the final time trial race she placed 15th, the second best Italian athlete.

A satisfied Walter Zini said: "the team did well. I'm happy with the girls' results. We started with a very young team, but we managed to perform at a good level. Alena's final standing is better than last year's since she finished 10th in the general classification. Georgia Williams also did a great job, she's very young but she has a lot of potential! She placed 18th in the general classification and 3rd in the young athletes' one. I'd like to also mention Dalia, she did especially well on the climbs and worked hard for the team, just like Doris Schweizer, Alice Algisi and the youngest of the group, Ilaria Sanguineti. Silvia was also a strong element of the team, she performed well and set a great example for her younger teammates. Unluckily though, Simona Frapporti had to leave the race due to some health issues. We were a bit unlucky, but that's part of our sport! I'm still satisfied with the result."

On a different note, Giulia Donato was chosen to be part of the Italian team that will participate in the European track championship. She will compete in the omnium category, since she's the Italian champion, and also in the team pursuit race.
